Background 背景

The Hong Kong ICT (HKICT) Awards aims at recognising and promoting outstanding information and communications technology (ICT) inventions and applications, thereby encouraging innovation and excellence among Hong Kong's ICT talents and enterprises in their constant pursuit of creative and better solutions to meet business and social needs.

The Hong Kong ICT Awards was established in 2006 with the collaborative efforts of the industry, academia and the Government. Steered by the Office of the Government Chief Information Officer, and organised by Hong Kong ICT industry associations and professional bodies, the Awards aims at building a locally espoused and internationally acclaimed brand of Hong Kong ICT awards.

There are eight categories under the Hong Kong ICT Awards 2019. HKCS is officially appointed by OGCIO to be the Leading Organiser of the Hong Kong ICT Awards 2019 - Smart Business Award category. The Smart Business Award covers 4 streams, including Solutions for Business and Public Sector Enterprise, Solution for SME, Big Data and Open Data Applications as well as Information Security. There will be one Grand Award in each category, and an "Award of the Year" will be selected from the eight Grand Awards by the Grand Judging Panel.

Objective 目的

The Hong Kong ICT Awards 2019: Smart Business Award is established for four major purposes:

1. The application of Information Technology is essential to improve the operating efficiency and productivity, quality and overall competitiveness and customer service for both our business and public sector enterprises. This stream recognises outstanding locally developed products and applications which provide cost-effective and innovative IT solutions to business enterprises as well as public sector organisations, through the deployment of proven and emerging information technologies. The awards encourage original products and services development by our IT industry as well as in-house applications developed by business and public sector organisations.
2. The backbone of our economy is our SMEs, of which the adoption of ICT is crucial for its efficiency and productivity, and its global reach in marketing strategy and business expansion. One of the streams in this Award, Solution for SME, is to recognise outstanding achievements in technological innovations in locally developed IT products and application/services for effective use by SME.

香港資訊及通訊科技獎旨在表揚及推廣優秀的資訊及通訊科技發明和應用，以鼓勵香港業界精英和企業不斷追求創新和卓越，謀求更佳和更具創意的方案，滿足企業的營運需要，造福社會。

通過業界、學術界和政府的共同努力，香港資訊及通訊科技獎於二零零六年成立。香港資訊及通訊科技獎由政府資訊科技總監辦公室策動，並由香港業界組織及專業團體主辦，目的是為香港建立一個廣受香港社會愛戴、並獲國際認同的資訊及通訊科技專業獎項。

2019香港資訊及通訊科技獎設有八個類別的獎項。香港電腦學會被正式委任為2019香港資訊及通訊科技獎 - 商業方案獎籌辦單位。商業方案獎包括四個類別，包括商業及公營機構、中小企業、大數據及開放數據應用，以及資訊保安。每個類別均設有一個大獎，而最終評審委員會會再從所有大獎中甄選出「全年大獎」。

「2019香港資訊及通訊科技獎：商業方案獎」具有四個主要目的：

1. 資訊及通訊科技的應用對於提升香港的產業、服務、產品質量和整體競爭力是不可缺少的。商業方案獎鼓勵本地出眾的資訊及通訊科技產品及應用，為商業及公營機構帶來具成本效益及創新的方案，從而推動資訊及通訊科技在商業活動上及日常生活上的應用。
2. 中小企業是我們的經濟支柱，而資訊及通訊科技的運用，對中小企業的環球營銷策略和業務拓展十分重要。商業方案獎設有中小企業獎，以鼓勵中小企業設計或採用的創新應用作品。

3. With the availability of low-cost high-speed processors and innovative analytics software to manipulate and analyse massive structured and unstructured data, big data is now universally recognised as an essential tool to enhance productivity, competitiveness, customer services and business growth. Open Data, if made available to the public in digital formats, can also be creatively re-used to develop innovative products. One of the streams in this Award, Big Data and Open Data Applications, is to recognise outstanding locally developed IT product and services in big data for specific business and industry domains and sectors; as well as innovative big data user applications developed in-house by an enterprise to enhance its business planning and operational objectives. It is also to encourage innovative and effective IT enabled Open Data schemes implemented by public and private sector organisations, as well as innovative applications by the open data community in creatively utilising open datasets to advance business interests.

4. With the ever-increasing security intrusion and breaches of corporate information systems across all sectors by unauthorised or malicious entities with significant monetary and data loss, operational and reputational damages; this award recognises outstanding IT products, services and user applications developed locally or their combination that provide access management, intrusion detection/prevention, anti-malware, or other system protection measures including cybersecurity to ensure the confidentiality, integrity and availability of personal and corporate information are maintained.

3. 隨著低成本高速處理器和創新分析軟件的廣泛使用，在操作和分析大量的結構性和非結構性數據方面大有助益，大數據現在被公認為提高生產力、競爭力、客戶服務和業務增長的重要工具。如果數據得以數碼形式開放予公眾，這些數據將可以更具創意地使用於開發創新產品。商業方案獎設有「大數據及開放數據應用獎」以表揚由本地公司為特定的業務和行業領域開發的優秀大數據資訊科技產品和服務，以及由企業內部開發的創新型大數據用戶應用程式，以加強其業務規劃和營運目標。此獎項亦鼓勵為公共及私營機構開發有效且創新的資訊科技開放數據計劃，促進商業利益。

4. 隨著不斷增加的未經授權或惡意實體的安全侵略和企業資訊系統，造成金融和數據丟失，營運及聲譽上的損失，此獎項鼓勵本地開發優秀的資訊科技保安產品、服務及用戶應用，提供存取管理、入侵檢測/預防、反惡意軟件或其他包括網絡安全的系統保護措施，以確保個人和企業信息的機密性、完整性和可用性。

The Hong Kong ICT Awards 2019: Smart Business (Big Data and Open Data Applications) Award

Big Data is “high volume, high-velocity and/or high variety information assets that demand cost-effective, innovative forms of information processing that enable enhanced insight, decision making, and process automation.” (Gartner). With the availability of low-cost high-speed processors and innovative analytics software to manipulate and analyse massive structured and unstructured data, big data is now universally recognised as an essential tool to enhance productivity, competitiveness, customer services and business growth.

A major segment of big data is Open Data, an essential feature of a successful smart city. Open Data refers to the great quantity and variety of information collected, produced and disseminated by governments and public bodies (e.g. demographic, socio-economic, geographical, meteorological and municipal management data) as well as business enterprises in their day-to-day operations. Such data, if made available to the public in digital formats, can be creatively re-used to develop innovative products.

This stream is to recognise outstanding locally developed IT product and services in big data including general big data analytics/visualisation hardware/software and service platform; tailored products/services for specific business and industry domains and sectors; as well as innovative big data user applications developed in-house by an enterprise to enhance its business planning and operational objectives.

This stream is also to recognise innovative and effective IT enabled Open Data schemes implemented by public and private sector organisations, as well as innovative applications by the open data community in creatively utilising open datasets to advance business interests.

The Hong Kong ICT Awards 2019: Smart Business (Information Security) Award (Excluding "Fintech Security")

With the ever-increasing security intrusion and breaches of corporate information systems across all sectors by unauthorized or malicious entities with significant monetary and data loss, operational and reputational damages, this stream recognises outstanding IT products, services and user applications developed locally or their combination that provide access management, intrusion detection/prevention, anti-malware, or other system protection measures including cybersecurity to ensure the confidentiality, integrity and availability of personal and corporate information are maintained.

此獎項同時為了表揚公共和私營部門組織實施的創新和有效的科技開放數據計劃，以及開放數據社區對於開放數據集的創新應用，以提升商業效益。

大數據是“大批量高速度或高品質的信息資產，需要高效創新形式的信息處理，以增強洞察力，決策制定和流程自動化。憑藉低成本高速處理器和創新分析軟件的可用性來操縱和分析大量結構化和非結構化數據，大數據現在被普遍認為是提高生產力，競爭力，客戶服務和業務增長的重要工具。

大數據的一個主要部分是開放數據，這是成功智能城市的基本特徵。開放數據是指政府和公共機構(例如人口，社會經濟，地理，氣象和市政管理數據)以及商業企業在日常運營中收集，製作和傳播的大量信息。這些數據如果以數字格式向公眾提供，可以創造性地重新用於開發創新產品。
